Snak om det

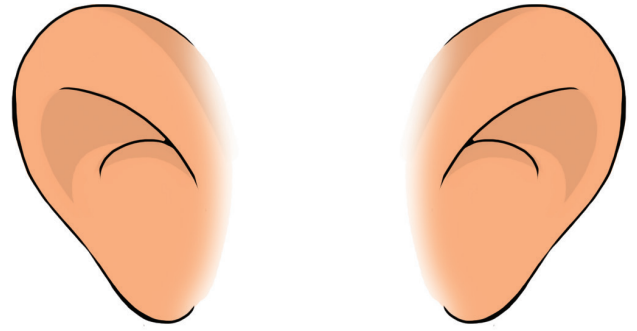

Prøv selv

At tænke tanker og føle følelser

Din hjerne skaber dine tanker.

En **tanke** er en idé, et billede eller tavse ord i din hjerne.

Vi har vores egne tanker ... og vi har tanker om andre.

Dit hjerte er symbol på dine følelser.

En **følelse** er noget, der sker i din krop.

Vi kan have mange forskellige følelser, når vi er alene,

og når vi er sammen med andre mennesker.

Vi bruger ord som glad, trist, sur og bange til at tale om vores følelser.
